Education

Chitkara Institute of Engineering & Technology, B.E in Computer Science (AI&ML) (2024-2028)

CGPA: 9.94

Coursework: Data Structures and Algorithms, Object Oriented Programming, Cloud Computing, Data Analytics, Java, Supervised and Unsupervised Learning, Database Management System, Frontend & Backend Engineering, Operating System, Internet of Things, Applied Soft Computing, Mathematics.

Govt. Model Sr. Sec. School Modern Complex Mani Majra | Chandigarh, 12th – 93.6% (2024)

Hansraj Public School | Panchkula, 10th – 94%

(2022)

Skills & Technologies

Programming Languages: Java, C, C++, Python, SQL

Frameworks & Tools: React.js, Django, Flask, Pandas, NumPy, Power BI, Jupyter, Git, Excel

Databases & Cloud Platforms: MySQL, MSOffice, Microsoft Azure

Soft Skills: Analytical Thinking, Innovation, Adaptability, Leadership, Communication, Problem Solving, Collaboration

Experience

ServiceNow AI. Accelerate Bootcamp- AI Bootcamp Participant | ServiceNow | June-July 2026

Selected for ServiceNow's immersive AI bootcamp, gaining practical experience in Agentic AI, Prompt Engineering, Multi-Agent Orchestration, and AI Safety.

Contributed as an **Organizing Executive** for Bits N Bytes and a **NSS Volunteer**, demonstrating leadership, teamwork, event management, and community engagement through campus initiatives.

Projects

Nexora | AI-Powered Decentralized Startup Launchpad

[GitHub](#) | [Demo Video](#)

- Nexora is an AI-powered decentralized startup launchpad that enables founders to pitch ideas, receive mentorship, raise funds, and helps investors make secure crypto investments.
- Supports AI-powered pitch evaluation, ML-based startup and mentor recommendations, risk & growth analysis, investor insights, and one-click Ethereum investments via MetaMask.
- Tech Stack: Django, Gemini API, Machine Learning models, HTML, Tailwind CSS, JavaScript, Chart.js, Solidity, MetaMask, and Ganache.

WealthPlay | AI-Powered Gamified Stock Market Simulator

[GitHub](#) | [Demo Video](#)

- WealthPlay is an AI-powered gamified stock market simulator that enables users to learn trading through realistic, risk-free market simulations using historical data and stochastic price modeling.
- Supports GBM-based market simulation, AI-powered trend prediction, volatility forecasting, regime detection, and gamified trading.
- Tech Stack: Python, Machine Learning (classification, volatility prediction, regime detection), historical market data, stochastic modeling (GBM + jump diffusion), local model training, and gamified learning workflows.

Terrax | Blockchain-Based Real Estate Investment Platform

[GitHub](#) | [Demo Video](#)

- Terrax is a blockchain-based real estate investment platform that enables users to buy, sell, and invest in properties through NFT-based fractional ownership.
- Supports KYC-verified property listings, AI-powered property valuation, fractional NFT trading, automated ETH conversion, secure MetaMask transactions, and portfolio analytics.
- Tech Stack: Django backend, HTML, CSS, Tailwind CSS, JavaScript, Solidity smart contracts, MetaMask wallet integration, Ganache & Hardhat for blockchain testing, CoinGecko API for ETH conversion, and NFT-based ownership contracts.

Key Achievements

- First Runner Up, BIOS Hackathon**, Thapar Institute of Engineering & Technology (2025)
- SemiFinalist, **HackIndia2025**
- Second Place, WebRelay Challenge**, ACM Student Chapter (2025)
- Solved **500+ Problems on Leetcode**, **HackerRank** Gold Badge in **C++, Python, MySQL, Java**
- Daily Category Winner **Technical Scripter** **Geeks For Geeks**

Certifications

- Google Cloud Skills-** ([View Badges](#))
- Microsoft:** Azure Data Fundamentals, Azure Fundamentals, AI Fundamentals ([ViewBadges](#))
- Cisco:** Cybersecurity, IoT
- Disha AI:** Generative AI Fundamentals, Data Structures & Algorithms
- Infosys:** Spring board java
